

Artwork Guidelines - Rear Inlay for Jewel Case

Rear Inlay:

Artwork must be supplied as per our specifications or your job could have delays in our quoted delivery and turnaround times or you could incur an artwork fee for re-doing artwork to the correct specifications.

The image should be 154mm by 121mm, a minimum of 300 dpi and supplied as a .psd, .cdr, pdf or .jpg CMYK.

Then create your artwork within this as 150mm x 117mm with 6mm spines each side and let the background colour or image fill the whole area. This allows a minimum 2mm bleed.

We have templates set up ready to place your image on, which provides the printer with the correct registration and cutting dimensions.

Important Considerations When Supplying Artwork:

Do not create an A4 page then create your image within that page, it must be an image of the exact dimensions as specified and supplied as a .psd, cdr, pdf or .jpg CMYK. Word or Publisher documents are not acceptable.

We have templates set up ready to place your image on, which provides the printer with the correct registration and cutting dimensions.

If in doubt or you cannot create the Artwork as specified:

Contact us for further information

or

We can create the Artwork for as little as \$50.00. Give us your background and ideas and we'll do the rest

or

We can design and create your Artwork from scratch. Contact us for a quote.
